

Are you having transport problems?

Just add
water.

Water is the
way to go.

The big advantage of water transport lies in centuries of experience...

...and in centuries of success yet to come.

Modern technology means modern solutions.

Modern solutions give the best results.

Everything is possible.

1. Bulk

Water is sustainable

The key to success is in co-operation.

The key to success is in co-operation.

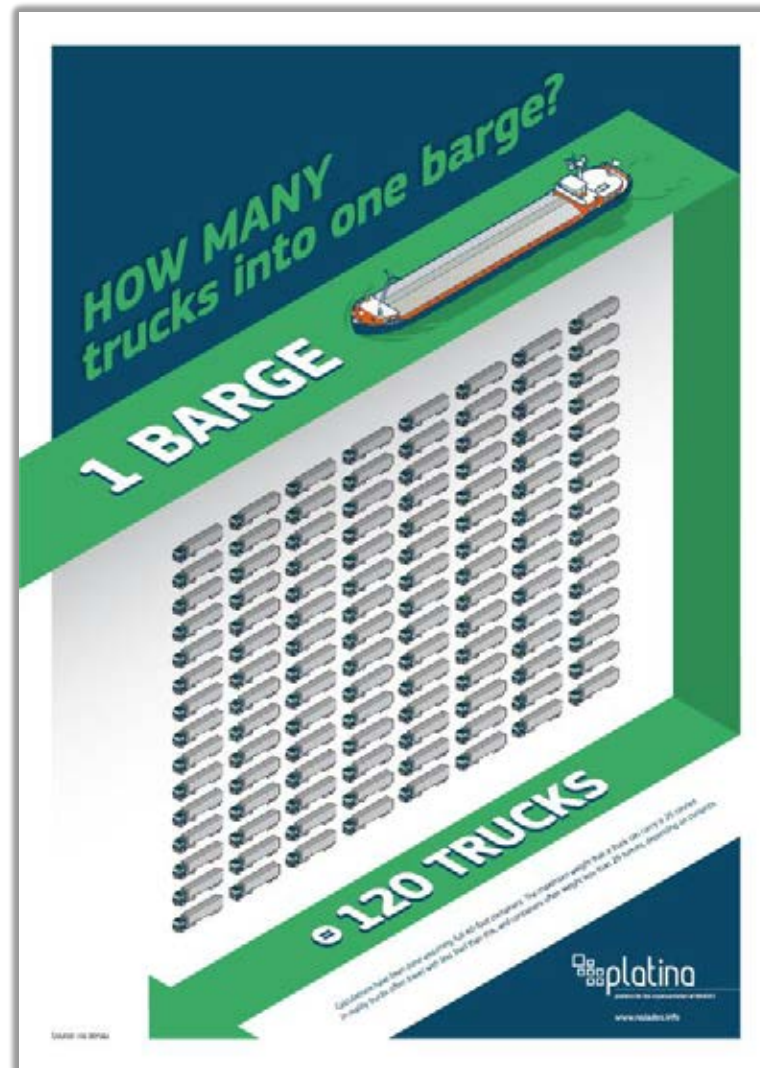

The key to success is in co-operation.

FACTS

Water transport allows you to transport more goods in one journey

In 2008. – 514 million tonnes of goods transported via water

Freight transport is expected to grow 50% by 2030. Inland waterway transport is your best solution.

20,000 Barges & 30,000 km of navigable waterways

All you have to do is follow the leaders:

DSM

PEUGEOT

KNAUF

JOHN DEERE

B/S/H/

All you have to do is follow the leaders:

We connect Europe.

Just add water.
